PROFHILO

Dermal biogenesis or skin regeneration.

PROFHILO is a new age dermal filler, often referred to as long term hydration for the skin. It stimulates the skin's own natural repair mechanism allowing the skin over a period of coming weeks to improve in hydration and look generally plumper.

We recommend 2 treatments one month apart initially, with a repeat treatment every 4 months, or 2 syringes again at 6 months to keep your new hydrated skin looking great.

	First 2 Treatments	Per Treatment
Cost for treatments.	£500.00 / £250.00
